Professional Summary

Full Stack Developer with the expertise in Android (Kotlin), Web development (React, Node.js), Cross platform ReactNative. Experienced in building scalable, production-grade applications, using modern, architectures like MVVM/MVI and clean architecture. Currently working in fintech domain at UBL as an android developer, contributing to secure and high performance mobile banking solutions. Skilled in AI integration, backend systems, and end to end application development with a focus on scalability, performance and user experience.

SKILLS

Mobile App Development

- Kotlin (Android Native)
- Jetpack Compose, XML
- MVVM /MVI architectures
- ReactNative (Cross Platform)

Web Development

- React.js, Next.js
- Node.js, Express.js
- RESTful APIs

Backend & Databases

- PostgreSQL, MySQL
- Firebase, MongoDB
- API Design and Integration

Dawood Waheed

Full Stack Developer | Android (Kotlin) | React/Node.js |
React Native | AI Integrations

WORK EXPERIENCE

Android Developer (FinTech - UBL)

O3 Interfaces Jan 2025 — Present

- Developed and maintain fintech android application using Kotlin.
- Implemented MVVM/MVI architecture with the clean architecture principles.
- Integrated secure REST APIs for the banking operations.
- Worked on performance optimization and secure data handling.
- Collaborated with the cross-functional teams (backend, QA, product).
- Follow strict fintech security and coding standards.

Full Stack developer

AI Shams Technologies Mar 2024 — Present

- Developing a comprehensive learning management system covering HR, Finance, Management, Teacher, Student and Admin roles.
- Implemented a role based access control system with the secure authentication for multiple user types.
- Designed scalable system architecture supporting large scale organizational work flows.
- Integrated real time notifications using Email and WhatsApp for alerts, updates and announcements.
- Participated in end-to-end development including system design, API development, testing and deployment.

Projects

Smart Distribution App (Android | Kotlin | Compose | MVI)

- Inventory Management System with product & supplier control.
- Agent onboard via company invitation code.
- Customer management, ledger tracking, Invoices management and sales generated handling.

AI Ecotrack (React Native |JavaScript | MVVM | Nodes.js)

- Service booking system for waste and maintenance operations. AI based waste detection system using yolo v8. Roboflow and Node.js integration for model deployment. Object classification into 3R categories (Reduce, Reuse, Recycle). Smart environmental decision support system.

EDUCATION

Nov 2021 - Jul 2025

Bachelors in computer Sciences, Arid Agriculture University |
Rawalpindi, Pakistan
